Summary	Bachelor of Science in computer engineering with hands-on experience in microcontrollers, Linux, C, and Python. Adaptable and naturally curious, I consistently apply what I learn through personal projects to deepen my understanding. Looking for an opportunity to further develop these skills while contributing to meaningful engineering work.		
Experience	Dyson, First Philippine Industrial Park II, Santo Tomas, Batangas Embedded Software Intern • Hands-on experience with Microcontrollers (NXP, STM32, ESP32) • Introduction & Implementation to CI/ CD • Web development with Scrum Poker and Jira REST API	May 2025 - August 2025	
Education	De La Salle University, Taft Manila Bachelor of Science in Computer Engineering • CGPA 2.859	October 2020 to June 2026	
Projects	Glove Controllers for 3D Media Creation in VR • Programmed an asynchronous Python middleware to sync multi-sensor glove data with the Blender API for real-time 3D procedural animation	2024 - 2026	
	Dyson Supersonic Fan • Created a replica of a Dyson fan with NXP boards • Implemented Unit Testing for CI/ CD • LCD Feature Added	June 2025 - August 2025	
	Torque Test Rig • Implemented a semi-automatic torque test rig as a destructive test for impellers • Utilize STM32 Nucleo 64	July 2025	
	Law Office Automation System • Developed the UI of a web-based platform to automate document requests • Implemented automated notifications and secure client-staff communication • Ensured data security with authentication, encryption, and role-based access control https://github.com/daxtangco/mcs-law	April 2025	
Skills	• Programming • Machine Learning	• Embedded Systems • CI/ CD	• Project Management • Linux
